How Married Couples Can Combine Optimal Roth IRA Conversion Planning, Appropriate Trusts, and Low-Cost Index Funds to Cut Taxes and Preserve Wealth?

These workshops are especially valuable for married IRA and retirement plan owners aged 60 – 75 with IRAs of \$500,000 or more.

The biggest and most common mistake married IRA owners make is not optimizing their Roth IRA conversion possibilities. It’s not rocket science, but it’s not a guessing game either. We found that there is a mathematical solution individual to each client that will maximize the value of your IRA and retirement plan for you and your heirs. Hint: The optimal plan is most likely a series of Roth conversions over a number of years to keep you in a lower tax bracket. Combine optimal Roth conversion and Social Security strategies and the difference could measure in the hundreds of thousands of dollars.

Trusts are the most misunderstood area of estate planning. There are critical decisions regarding trusts that all married IRA and retirement plan owners must make. Unfortunately, this planning is done wrong more often than it is done right. Learn how to get it right.

Many families are not taking advantage of critical strategies like Roth IRA conversions and the “apply and suspend” technique to optimize their Social Security benefits. In addition, they are still using active money managers or investing in actively traded mutual funds instead of using low-cost index funds to reduce their investment expenses and increase their return.

Are YOU one of those IRA or retirement plan owners who have not optimized your Roth IRA conversion strategy? Are you aware of all your options for collecting Social Security? Does your estate plan have properly drafted trusts?

Here’s how to get the help you need! Attend one or all three of the FREE Workshops—presented by CPA and Attorney James Lange—described below.

Roth IRA Conversions: Pay Taxes Once and Never Again

If you have an IRA or retirement plan worth \$100,000 or more, you and your family could gain \$1,000,000. We'll explain how!

A Roth IRA conversion requires paying taxes now on a portion of your IRA or retirement plan. That may seem counterintuitive, but look at the big picture. The new Roth IRA will grow income tax-free for the rest of your life, your spouse's life, your kid's lives, and even your grand-kid's lives. The real eye-opener, however, is that Roth IRA conversions are great for older IRA owners, regardless of the benefits to future generations.

Roth IRA conversions for married couples protect women who are likely to live longer and will be faced with higher tax brackets as singles if their husband predeceases them. Properly applying Roth IRA conversion strategies will improve the quality of life for you and your family.

With a Roth conversion, you are buying out Uncle Sam, your IRA partner. After Uncle Sam is bought out, all future profits go to the family without any future income taxes.

During this information-packed workshop, we present objective peer-reviewed analysis and cutting-edge tax strategies to help you get even more tax benefits from a Roth IRA conversion. We examine the question of when to take Social Security and whether the "apply and suspend" strategy is for you in conjunction with optimal Roth IRA conversion planning.

The result could be tens of thousands, potentially hundreds of thousands or even a million dollars more purchasing power for you and your family. We strongly encourage you to reserve your seat now.

Who Says You Can't Control From the Grave? Using Trusts to Protect Your Family

Trusts as Beneficiaries of IRAs & Retirement Plans

If done right, using a trust as the beneficiary of your IRA or retirement plan can protect your family and defer taxes for two generations. In the case of the beneficiary of a Roth IRA, the appropriate trust can insure tax free growth for the family for multiple generations.

Done incorrectly, or inappropriately, trusts can become a nightmare. Assuming a trust is appropriate, the key to tax protection comes from using the proper wording called "see-through" or "conduit" language. That way, your family will get the protection of a trust and the tax benefits of an inherited IRA or retirement plan.

Income taxes are a major consideration because trusts normally pay higher income taxes than individual taxpayers. This can be avoided with a perfectly legal loophole that you should know about. The vast majority of IRA and retirement plan owners make mistakes when planning for

their IRAs, Roth IRAs and retirement plans after death. We will show you how to get it right.

Should You Plan to Avoid Probate?

There are definite pros and cons to avoiding probate. Avoiding probate minimizes delays and paperwork and is less expensive for your heirs. The main way to avoid probate is through the use of a revocable or living trust. But simply establishing a trust is not sufficient. It needs to be funded to serve its purpose.

Funding a trust often means transferring certain assets like investments and even your house into the trust. These transfers take time and money. Do the advantages outweigh the disadvantages? It isn't a slam dunk "yes" every time. Bestselling author, CPA and estate planning attorney **Jim Lange** will explain these topics and more in the workshop.

What Makes More Money? The S&P 500 or Active Money Managers?

Active or passive? This is one of the most important questions each investor must answer. It's true that 86% of active money managers underperform their benchmark indexes. Due to lower investor costs and superior net results, there has been a swing away from actively managed funds and toward index investing.

But if index funds are the right answer, which funds should you hold in your portfolio? There is a particular set of funds, Dimensional Funds, generating returns that stand above the rest. DFA has two Nobel Prize

winners on their board of directors. *In this special investment workshop, we'll cover:*

- The differences between active and index management
- Whether active managers and investors statistically outperform their index benchmarks
- Dimensional Fund Advisors (DFA) index funds, engineered using Nobel Prize winning research
